

Observing nature in your school grounds The Schools Bird Box project is now open to all UK schools!

Managed by the See Nature team, the BirdBox project is an exciting way to inspire and connect your pupils with nature. Throughout the year your school will be able to stream live video from your birdbox, feeder station and other webcam wildlife habitats. Bring the outside world into your classrooms and inspire the next generation of nature enthusiasts.

The BirdBox Project - not just a live streaming service, but a purpose built nature and learning programme.

- Throughout the year, broadcast live video streams from your birdbox, feeder station or other webcam wildlife habitats to any computer or mobile device.
- Access to hundreds of Teaching & Learning resources supporting topics in the new Primary Science curriculum.
- Between March to June, access our Daily Chatterbox news reports posted by our Environmental Experts. Let your pupils learn all about the birds that frequent our school grounds and gardens and visit our shores every summer.
- Access to our project blog. Share news about what is happening in your birdbox with other project schools.
- Visit the Pupil Zone, where you will find lots of games, puzzles and things to do and make for your pupils to try in school and at home.

Convert your Web cam Bird Box to a Webcam Bird Feeder!

A great opportunity for your pupils to engage with nature all year round?

Why not at the end of the summer nesting season remove the webcam from your bird box and put in the bird feeder that comes supplied with the bird box. Then you can enjoy throughout the autumn and winter months live streamed video of the birds that visit your school feeder. Looking for inspirational, nutritious and easy to make bird foods? Visit the See Nature website every week for new bird food recipes to make!

Join the 2020 BirdBox Project and bring nature alive in your school!

Register for the BirdBox Project for just **£199+VAT**. Stream from your webcams all year round and join our online education programme.

Watch live video inside your school bird box and observe the birds that visit your school grounds

Registration costs just **£199+VAT** for the year. To take part in the project, all you will require is a birdbox with a fitted webcam installed on your school grounds, connected back to a designated computer in your school. The video feed from the birdbox webcam can then be streamed to the BirdBox project website and viewed on any computer or mobile device, inside or outside school.

What equipment will our school need?

If you already possess a webcam birdbox, then it is very likely you will be able to use this box and take part fully in the project. However, if you are taking part in a webcam birdbox project for the first time, or need to upgrade your existing box, then we encourage you to take advantage of the fantastic deal we can offer to our project schools through our supplier GardeNature for just **£135+VAT**.

Guarantee activity, and use your webcam all year round!

The package includes a high-resolution colour & night-vision webcam, birdbox, feeder station, 20m cable, and a video-to-USB convertor. The webcam can be positioned in either the birdbox or feeder station, meaning you can guarantee activity, and use your webcam outside of nesting season. Further details can be found on the next page.

Register now to take part in the Schools' Webcam Bird Box project

To take part in the 2020 Schools' Bird Box project all schools must have their bird boxes ready and in place by Friday 6th March 2020. Full instructions on how to install the box to a tree or outer wall are provided. The box can be situated up to 50 metres away from the laptop or PC that will be managing your live stream. To register, please complete and return the accompanying booking form or visit <http://www.seenature.org.uk>.

What do you need to take part?

Purchasing and installing your webcam birdbox equipment

The Birdbox project costs just £199+VAT for your whole school to register and receive our year round streaming service, and enjoy the exciting 12 topic education programme in Spring / Summer 2020.

If you require equipment and assistance in installing your birdbox, we offer a fantastic equipment package deal and an installation service. Please find details and costs below.

Add-on 1: Webcam, birdbox and feeder + video-to-USB adapter

Webcam, birdbox + feeder package (including 20m cable)

(<http://www.gardenature.co.uk/discovery-nestbox-feeder-cam-ultra-hi-resolution>)

Video to USB adapter

(<http://www.gardenature.co.uk/video-usb-capture-pc-/-mac>)

Total equipment package cost for schools:

£135.00+VAT inc. P&P

(normal price £180+VAT)

Self - Installation

Self - installation is a straight forward process and will take between 1.5 and 2 hours complete. Our IT Team will then support you set-up and test your live stream.

However, if you would rather our installation team fit your box and set up the live stream please contact us. Prices for Installation and set-up start from £179 plus VAT

Webcam birdbox installation

Let us fit and test your birdbox and webcam

Installation and testing of all webcam birdboxes by our team takes 2 hours approximately. This includes the setup and configuration of your live stream. 1 year warranty - should your installed equipment develop a fault during the project, it will be replaced free of charge.

From £179+VAT (Out side the M25 corridor)
